Ubuntu 24 script running

Put every file in same path

File1 = canonical_ubuntu_24.04_lts

File2 = run_stigs_checks.sh

File3 = stig_results.txt

Step1 : Copy JSON file in paths

canonical_ubuntu_24.04_lts

Step1 : make a new file in same path

sudo nano run_stigs_checks.sh

Step3 : paste this in nano file and save

```
#!/bin/bash
# Ubuntu 24.04 STIG Auto-Check Script
# Works when both the script and JSON file are in the same folder (/home/nik)

# Automatically detect the folder where this script is located
SCRIPT_DIR="$(cd "$(dirname "${BASH_SOURCE[0]}")" && pwd)"
JSON_FILE="$SCRIPT_DIR/canonical_ubuntu_24.04_lts.json"

# Check for jq (required to parse JSON)
if ! command -v jq &> /dev/null; then
  echo "Installing jq (required to read JSON)..."
  sudo apt update && sudo apt install -y jq
fi

echo "===== Running Ubuntu 24.04 STIG Checks ======"
echo "Using STIG file: $JSON_FILE"
echo

# Verify the JSON file exists
if [ ! -f "$JSON_FILE" ]; then
  echo "❌ Error: JSON file not found at $JSON_FILE"
  echo "Make sure 'canonical_ubuntu_24.04_lts.json' is in the same folder as this script."
  exit 1
fi

# Read and run each STIG check
jq -r '.stig.findings[] | "\(.id): \(.title)\n\(.checktext)\n----"' "$JSON_FILE" | while read -r line; do
  if [[ $line == ---- ]]; then
    echo
  elif [[ $line == \$* ]]; then
    CMD=$(echo "$line" | sed 's/^\$ //')
    echo "Running: $CMD"
    eval "$CMD"
  else
    echo "$line"
  fi
done
```

```
nik@nik-VMware-Virtual-Platform:~$ sudo cat run_stigs_checks.sh
#!/bin/bash
# Ubuntu 24.04 STIG Auto-Check Script
